Top 30 Pathways (Sorted by FDR)
GO:BP − anatomical structure development
GO:BP − multicellular organism development
GO:BP − animal organ morphogenesis
GO:BP − multicellular organismal process
GO:BP − developmental process
GO:BP − anatomical structure morphogenesis
GO:CC − collagen trimer
GO:CC − extracellular region
GO:CC − extracellular matrix
GO:CC − external encapsulating structure
GO:CC − cell periphery
GO:BP − system development
GO:CC − collagen−containing extracellular matrix
GO:BP − tissue development
GO:MF − extracellular matrix structural constituent
GO:BP − tissue morphogenesis
GO:BP − embryonic morphogenesis
REAC − Regulation of FZD by ubiquitination
GO:BP − Wnt signaling pathway
GO:BP − animal organ development
KEGG − Wnt signaling pathway
CORUM − LGR5−RNF43−RSPO1 complex
GO:BP − pattern specification process
GO:BP − skeletal system morphogenesis
GO:BP − epithelium development
GO:BP − kidney development
GO:BP − regulation of Wnt signaling pathway
GO:BP − renal system development
REAC − Collagen biosynthesis and modifying enzymes
GO:BP − regionalization
